

KYCS

LOCATE

## THEFT PREVENTION TIPS:

Contractors play an active role in protecting equipment against theft and are encouraged to follow these preventative measures.

- Install a KYCS Locate tracking device on assets
- Advise KYCS Global as soon as possible after the disappearance of the asset
- Keep jobsite well lit
- Control access to site
- Develop a jobsite security plan
- Immobilize equipment, remove rotors, batteries, etc.
- Get employees involved and responsible for security
- Bring valuable pieces of equipment to a secure area on weekends

### STATISTICS

Total assets protected as of December 2020:

= \$800,000,000+

On November 26, a client called KYCS Global to report that his 5-Ton Tandem-Wheel Dump Trailer was stolen in Windsor, Ontario, having last seen it on November 25. The equipment is worth approximately \$12,000.

The KYCS recovery team tracked the asset across HWY 401 West, where through our partnership with Crime Soppers, the OPP in London was engaged.

KYCS and OPP dispatch coordinated the pulling over of multiple 53-foot transport trailers, having the Ministry of Transportation direct all transport trucks to inspection near the US border, and ultimately worked with Border Services and US Michigan State Troopers to recover the unit.

Needless to say, the client was pleased.

---

*"Thanks KYCS recovery team! I'll be equipping the rest of my equipment with KYCS Locate"*
